Skills

Nuxt.js

Vue

Profile

Frontend Developer focused on complex business applications

I build high-load **client-administrative systems** that help businesses scale and users work without unnecessary friction. I know how to strike a balance between clean architecture, elegant code, and real-world product value.

I always fully immerse myself in the product, aiming not just to get things done, but to do them well — bringing value to both **the product and the team**. To me, every line of code is a **responsibility to the user**.

I have a lot of experience with Vue, Nuxt

A programmer is not just someone who writes code. They are someone who solves problems.

Education

Bachelor's degree

Sep 2018 - Jul 2018

Dnipro State Technical University, Kamianske

Employment

Lead Front end developer

Jan 2022 - Present

Planeta Kino, Kyiv

Developed admin panels, websites, and cashier workstation systems (ARM).

Mentored frontend developers, reviewed merge requests (MRs), and built complex components and modules.

Took part in designing and implementing project architecture.

Improved frontend performance to meet high PageSpeed scores and web performance standards.

Built cross-platform desktop apps using Electron, integrating web technologies with native capabilities.

Seo

Tech stack: Vue, Nuxt, JavaScript, Tailwind CSS, Vuexy, BootstrapVue, Axios, GraphQL, REST, WebSockets, AWS, Electron, payment terminals, Vchasno PRRO, HLS, Video.js

Front end developer

Aug 2021 - Jan 2022

VJET GROUP, Dnepropetrovsk, Dnepropetrovsk region, Ukraine

Developed client-side applications for international clients:

- Admin panel for the “Choice” restaurant chain
- Admin panel & website for a Polish furniture factory (B2B & B2C)
- Admin panel for an advertising company managing over 1,000 tablets across Ukraine

Led projects end-to-end: designed architecture, implemented key modules, and

Kind regards, Stanislav Radchenko
